Context (methodology trends in Croatia)		
Methodology trends Qualitative methods courses Method used in recent sociology PhD thesis	-	-
CAQDAS spread		
CAQDAS within methods courses in Croatia	Does their institution of affiliation hold an institutional CAQDAS licence? Do they themselves possess a CAQDAS licence? Do they know someone who uses CAQDAS? Did they use CAQDAS after the workshop?	-
Reasons for (not) adopting CAQDAS (opportunity, attainability of resources, personal attitudes on CAQDAS)		
-	Would they use CAQDAS if their institution had it? If they did not use CAQDAS after the workshop, what were the reasons? If they had a chance to use it after the workshop, but decided not to use it, what were the reasons? If they were to transcribe interviews, how would they do it (what tools would they use)?	Reasons for using CAQDAS Comparison with alternatives, e.g. using word-processor, paper-and- pencil coding How did they acquire the software?
Grounds for deciding to use a particular software package		
-	Which CAQDAS package they used (those who did) Why that particular package?	Reasons for choosing the particular CAQDAS package Comparative advantages of that software package
Experiences with CAQDAS usage		
-	-	Describe how they used the software Did software influence the research process? How? Did they face a situation when they wanted to do something with the data but they could not do it in the software they used? Whether they had a feeling that the software influenced any important aspect of the research process (e.g. analytical conceptualisation)
